

## Beigrow High Grow

Advanced Density Stone Wool Slab

### Higher water capacity

is a premium high-density stone wool slab designed for drier climates, ensuring consistent moisture in the root zone. Its advanced fiber structure maximizes water retention for stable plant growth and precise irrigation control. It supports uniform root development, reduces stress in dry conditions, and delivers reliable, high-quality crop performance.

### Key Advantages

- Designed for drier climates
- Advanced fiber structure
- Increased water-holding capacity
- Consistent moisture in the root zone
- Reduces plant stress in dry conditions
- Promotes healthier plant growth
- Improves efficiency and crop consistency

Higher water capacity

### Recommended Crops

Tomatoes • Cucumbers • Sweet Peppers  
Eggplants • Other vine crops
