Advanced Density Gradient Stone Wool Slab

Perfect Balance for Powerful Roots

is a next-generation stone wool slab engineered for professional hydroponic greenhouse cultivation. The density-gradient structure balances water retention and oxygen availability, supporting strong root development and stable irrigation management throughout the crop cycle.

Key Advantages

- Balanced water and oxygen in the root zone
- Uniform root system development
- Better irrigation control and drainage
- Stable EC and pH conditions
- High productivity and consistent crop quality

Recommended Crops

Tomatoes • Cucumbers • Sweet Peppers
Eggplants • Other vine crops
